Highly motivated and passionate front-end developer who is enthusiastic in learning. Deep interest in solving problems to improve user experiences. Be able to effectively self-manage on independent projects and also successfully collaborate in a team environment.

EXPERIENCE

Peer tutoring Algonquin College

Ottawa, ON
Sep 2021 - Present

• Act as a guide and helped first-year students with their course materials by one-on-one tutoring
• Provide mentorship and guidance to students in various terms of the program to succeed academically

PROJECTS

Portfolio Website HTML | CSS | JavaScript | Materialize
• Built **a fully responsive and personal** portfolio website using Materialize.
• Deployed this website to netlify and leveraged custom domain name. (https://www.yoonak.com)

Giftr HTML | CSS | JavaScript | Express | NodeJS | MongoDB | Docker | AWS
• Developed **a full-stack web app** as a group project to save gift ideas for people the user knows.
• Built the **RESTful API** web service for a prototype of a fictitious application to track gift ideas using **Node.js**, Express, Mongoose and MongoDB.
• Implemented user management functions such as registration, authentication with **JSON Web Tokens** (JWT), change password, get current logged-in user and functionality to perform basic **CRUD operations**.
• Fetched the data from RESTful API and built the application functionality, design, and usability for the user.
• Deploy the application containers to **AWS Fargate** with an Application Load Balancer.

Weather web app HTML | CSS | JavaScript
• Built a weather web app based on a mobile first, responsive design using **two third-party API services** (OpenWeather and LocationIQ) create a simple HTML5 app to allow the user to look up weather forecasts for various locations.
• Used **local storage** to display the most recent location and its data by default when the users first open or refresh this page.
